

# A nation-wide program to train high school students in AI.

## The brief.

Education Changemakers were approached by Microsoft Australia to run a national campaign to educate Australian students in Artificial Intelligence and the Azure cloud.

## What we did.

We worked in partnership with Microsoft Australia to create the **AI for Good Challenge**. A teacher training approach was created, with a student curriculum built (focused on Years 7-12). We built the brand, challenge website, assessment approach, ran in person and digital hackathons across Australia and the state and national finals. All work was curriculum aligned and focused on supporting teachers to run the challenge in their own classes.

53

student workshops held across Australia.

5000+

students submitted entries to the challenge.
