

Helping new schools launch more effectively.

The brief.

Education Changemakers was tasked by Microsoft to build out the Flagship Schools program and provide support to new schools launching around the world.

What we did.

We began by building the Flagship Schools learning strategy, and then built out a wide range of resources including project management timelines, key moments in the building of a school, technical toolkits for learning approaches, curriculum choices, technology, recruitment, marketing, security and building construction. This was supported with a ten episode podcast series and a three day workshop in Seattle, USA with 25 international schools.

15+

new school builds across Australia have since received focused support from EC.

25

new school builds supported through the in-depth program.
