

# Scaling up Victoria's best-practice education ideas.

## The brief.

Education Changemakers was tasked by HundrED (Finland) and Atlassian to profile and support the scaling of ten high impact education ventures from across Victoria, Australia.

## What we did.

We conducted a state-wide competition across Victoria to identify ten best-practice initiatives that could be scalable. All ten initiatives received intensive scale training through an accelerator program, and then in-depth mini-documentaries and training toolkits were created on each approach. This program was launched with 2000 educators as part of our own annual event Educhange event, and then marketed nationally.
