

# Unleashing changemakers across Romania.

## The brief.

Education Changemakers was approached by AVE (Romania) to develop a nation-wide program to build a movement of innovative educators across the country.

92

senior educators took part in the program.

7000+

children saw improved learning outcomes as a result of initiatives launched.

## What we did.

We built a staggered program that began in year one with the selection of a number of school leadership teams, who took part in an a workshop series with ongoing support. In the second year these change efforts were embedded with further training and support for participants. In the third year these educators were trained up as coaches and mentors, and supported to scale their learning to other schools in Romania. The program is now run entirely by AVE.
