

# Rapid state-wide hybrid learning PD for Queensland educators.

## The brief.

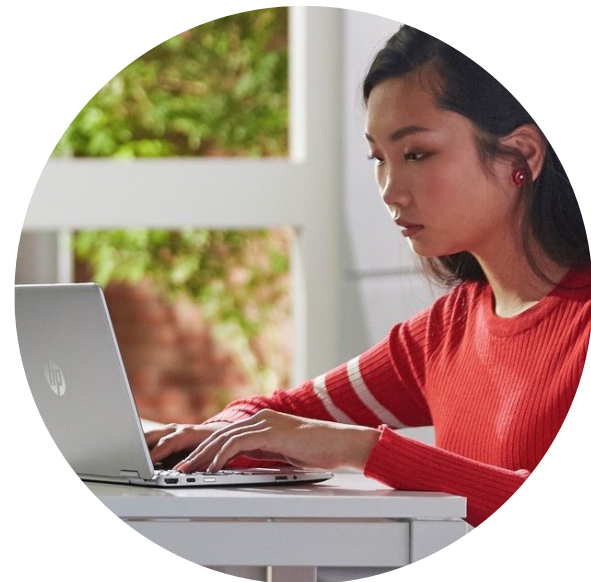

Education Changemakers was tasked by Education Queensland (EQ) and Microsoft to develop and execute a PD program to rapidly upskill educators in hybrid learning in Microsoft Teams.

1240+

schools were able to access the professional development program.

15

working days from the initial brief to resources being ready to deploy.

## What we did.

We rapidly built out a professional development strategy which would allow for quick up-skilling of educators across the state at the beginning of the COVID-19 crisis. This then led to us creating webinars, training videos, toolkits for parents, students, educators and school leaders. This program had a 'learning first' component, ensuring that educators were fostering quality learning remotely, drawing on the best features of the Microsoft Teams software.
