

Helping leadership teams across Western Sydney transform their schools.

The brief.

Education Changemakers was approached by the NSW Ministry of Education to support school leadership teams to prepare and implement their strategic improvement plans.

What we did.

We drew on our established Change Leader course (informed by our ASCD published book Dream Team), to launch a customised program for the schools across several regions in Western Sydney. Over two years we worked with multiple cohorts of school leaders to help them inform, innovate and implement their strategic improvement plans. This program had a blend of learning on change management, innovation, human centered design, instructional leadership and transformational leadership.

25,000+

students impacted by strategic changes.

275

school leaders took part in the program.
